

EXAMPLE ONLY

Agency Playbook

Pilot Reference — Filled Example

AGENCY

Metro Regional ECC (fictional)

INTERNAL — CONFIDENTIAL

Prepared: July 09, 2026

Apps on Demand LLC d/b/a Rapid Cortex

■ **EXAMPLE ONLY** — fictional agency for training and template reference. Copy AGENCY_PLAYBOOK_TEMPLATE for real agencies; store filled copies outside public repos if they contain contacts.

Field	Value
Agency	Metro Regional Emergency Communications Center (fictional)
Pilot type	PSAP / ECC — assistive AI pilot
Reference template	AGENCY_PLAYBOOK_TEMPLATE.md

A. Agency Identity

Field	Value
Agency legal name	Metro Regional Emergency Communications Center
Public safety org type	Regional ECC / PSAP
Pilot window (start / end)	2026-08-01 → 2026-09-30 (60 days)

B. URLs and Environments

Environment	Web Base URL	API Base	Notes
Training / staging	https://app.rapidcortex.us/metro-train/login	Not disclosed to floor staff	Training accounts only
Pilot production	https://app.rapidcortex.us/metro/login	BFF proxy — browser uses web origin only	Live pilot floor

Default jurisdiction slug(s): metro (training: metro-train)

Password / MFA policy owner: Dana Chen, IT Director — dchen@metro-ecc.example.gov

C. Operational Contacts

Role	Name	Email / Phone	Hours
Agency pilot executive sponsor	Chief Maria Okonkwo	mokonkwo@metro-ecc.example.gov	Business
IT / identity (Cognito)	Dana Chen	dchen@metro-ecc.example.gov	07:00–19:00 ET
ECC supervision lead	Lt. James Rivera	jrivera@metro-ecc.example.gov	Shift coverage
Medical director / protocol authority	Dr. Patel (EMS medical control)	Via agency medical director office	On-call
Rapid Cortex support (contract)	RC Pilot Desk	pilot@rapidcortex.us	Per SUPPORT_MODEL

D. Assistive AI and Escalation (SOP Alignment)

- **Agency acknowledgment:** AI output is **decision support only** — dispatchers and supervisors retain authority; CAD and radio are systems of record.

- **When dispatchers must stop using AI suggestions:** Active hostage/barricade per local SOP; any time supervisor declares "AI hold"; when transcript confidence is flagged and supervisor unavailable > 2 min — use voice-only protocol.
- **Supervisor review SLA for AI-flagged incidents:** Supervisor acknowledges within **15 minutes** during peak; **5 minutes** when AI flags weapons or officer-down categories (agency-defined).

E. Protocol Guidance

Named protocol pack version(s):

Metro Fire/EMS v2024-Q4 (approved 2025-11-01)

Sign-off record:

Email approval from Dr. Patel on file with ECC training office (ref: MRECC-PROTO-2025-11)

Process when local SOP changes mid-pilot:

Freeze protocol pack updates until weekly pilot review; RC applies pack version bump only after written agency approval.

F. Data — Classification and Handling

Classification:

Incident metadata, transcripts, and AI analyses treated as **law enforcement sensitive / CJIS-adjacent** — minimum necessary access.

Support tickets:

Use ticket body for symptoms only; **do not** attach full transcripts unless legal approves; always include incident id and UTC timestamp.

G. Retention, Export, and Deletion

Retention:

Pilot data retained **90 days** after pilot end unless extended in writing; aligns with TRANSCRIPT_RETENTION_POLICY_DAYS=90 on stack.

Export requests:

Lt. Rivera — coordination with RC ops within 5 business days.

Deletion requests:

Chief Okonkwo + agency counsel — written request to privacy@rapidcortex.us

Legal hold:

Agency counsel — counsel@metro-ecc.example.gov

H. Incidents and Outages

Severity	Agency Definition
P1	Rapid Cortex unavailable during live 911 operations for > 5 min
P2	Multilingual or analyze failures affecting > 25% of active calls

Runbook addendum: Floor falls back to CAD/voice-only; supervisors notify RC Pilot Desk within 15 min of P1.

I. Training Sign-Off

Audience	Trainer	Date Completed
Dispatchers (12)	Lt. Rivera	2026-07-28
Supervisors (4)	Lt. Rivera + RC SE	2026-07-29

Audience	Trainer	Date Completed
Admins (2)	Dana Chen	2026-07-27

Checklists on file: PILOT_DISPATCHER_CHECKLIST.md, PILOT_SUPERVISOR_CHECKLIST.md, PILOT_AGENCY_ADMIN_CHECKLIST.md

Modules in Pilot Scope (Reference)

Per signed pilot scope agreement (fictional):

- [X] Real-time transcription
- [X] AI incident analysis (assistive)
- [X] Supervisor monitoring / QA sample
- [X] Read-only CAD adapter (mock feed for training; read-only vendor sandbox week 3+)

Excluded from this pilot: CAD write-back, NCIC, autonomous routing

■ **Non-goals reminder:** This pilot does not imply CAD certification, full PSAP replacement, or formal compliance attestation — see NON_GOALS.md.
