

Rapid Cortex Agency Pilot Scope Agreement - Draft

Editable business and operational terms for a controlled agency pilot.

Pilot Purpose

The pilot evaluates Rapid Cortex as an emergency communications decision-support platform. The pilot is intended to validate workflow fit, operational usefulness, security posture, user experience, and integration readiness.

Included Capabilities

- Dispatcher and supervisor access
- Caller text/photo/video link
- Incident summary and translation/transcription assistance
- Agency-scoped audit logs
- Read-only CAD adapter or mock data integration
- Pilot usage reporting
- Admin onboarding and role management

Excluded Capabilities

- CAD write-back unless separately authorized
- NCIC or criminal justice database access
- Automated emergency dispatch decisions
- Medical/legal command replacement
- External evidence export without agency approval

Pilot Responsibilities

Party	Responsibilities
Rapid Cortex / Apps on Demand LLC	Provide hosted pilot environment, onboarding support, security documentation, issue tracking, training materials, and weekly pilot summary.
Agency	Identify pilot users, provide workflow feedback, assign agency admin/IT contact, approve any integrations, and define data retention expectations.

Pilot Success Criteria

- Users can complete core workflow without training beyond onboarding guide
- No cross-agency data exposure
- Audit logs show user actions clearly

- Media links expire properly
- Agency stakeholders agree whether to proceed to paid deployment or expanded pilot
