The Challenge Facing Public Safety Today

Dispatchers, supervisors, and command staff operate under extreme pressure
Often without the intelligence tools they deserve.

Information Overload

Multiple simultaneous calls with no AI-assisted triage or pattern recognition. Dispatchers manually manage high-stakes, high-volume environments without intelligent decision support.

Supervisor Blind Spots

No real-time floor-wide visibility without physically walking the room. Supervisors miss coaching moments, incident escalations, and call quality issues happening in real time.

CAD & System Data Silos

Critical incident intelligence is locked in CAD systems that don't interoperate. Context is lost between tools, creating operational gaps especially during major events.

Manual Compliance Burden

QA review, transcription, audit logging, and post-incident reports require extensive manual effort — consuming time that should be focused on active operations and personnel.

What Is Rapid Cortex?

A next-generation intelligence and decision-support platform that enhances operations without replacing your existing systems, staff, or workflows.

- AI-powered real-time analysis during live calls — no dispatcher action needed
- Automated transcription, translation & structured incident documentation
- Supervisor dashboards with floor-wide situational awareness
- CAD integration without replacing your existing CAD system
- CJIS-aware architecture built for public safety compliance
- 87 features across 12 capability domains — Essential through Enterprise

Core Platform Capabilities

87 features across 12 capability domains — purpose-built for public safety operations.

AI-Powered Intelligence

Real-time incident analysis, pattern recognition, anomaly detection, and decision-support delivered live during calls without dispatcher intervention.

Live Transcription & Translation

Accurate timestamped transcripts with 70+ language multilingual intake. Automated incident documentation from call audio — no manual transcription.

Supervisor Command Dashboard

Floor-wide real-time visibility across all active incidents and personnel. QA tools, coaching triggers, and command-level situational awareness.

CAD Integration

Read-only metadata integration and AI-assisted write-back to CAD. Works alongside your existing CAD system — no replacement required, no vendor lock-in.

Incident Management

Major incident workflows, war rooms, runbooks, escalation engine, post-incident reviews, stakeholder status pages, and reliability reporting.

Security & Compliance

CJIS-aware architecture, audit logging, role-based access control, MFA enforcement, data retention controls, and custom compliance review packages.

AI-Powered Dispatch Intelligence

Automated intelligence delivered live during active calls — zero dispatcher action required.

● Real-Time AI Analysis

Surfaces patterns, anomalies & decision-support insights automatically during live calls.

● SOP Protocol AI

AI aligned to your agency SOP/protocol libraries for consistent, compliant intake guidance.

● Caller Media Intake

Accept images and video from callers during active incidents for enriched situational context.

● Multilingual Intake

70+ language real-time translation — eliminating interpreter delays for non-English callers.

● Auto-Documentation

Automatic incident summaries and structured data generated directly from call audio.

Designed for Dispatchers

- AI works in the background — zero additional clicks
- Insights surface contextually at the right moment
- Never overrides dispatcher judgment or authority
- Supports — does not replace — human decisions
- Optimized for low cognitive load under high stress
- Works in parallel with all existing workflows

Sub-second AI response time on active calls — built for real-time operations

CAD-ready panel

PENDING

CAD payload prepared. Dispatcher review is required
before submission unless agency automation policy
permits otherwise.

ACTIVE INCIDENTS

CAD#	Pri	Type	Loc	T	St
76b14294	P3	Unknown	8062 Sonoma	3d ago	ACTIVE

Supervisor Command Center

Real-time floor visibility and major incident command tools for supervisors and command staff.

Live Incident Dashboard

Monitor all active calls, incidents, and personnel in real-time from a single command view — without physically leaving the supervisor console.

QA & Dispatcher Coaching

Live and post-call quality review, dispatcher coaching trigger tools, performance trend analytics, and compliance scoring across all sessions.

Major Incident & War Rooms

Command-level major incident workflows with war rooms, runbooks, escalation engine, on-call routing, and stakeholder status page publishing.

Additional Supervisor Capabilities

- Post-incident review & timeline reconstruction
- Cross-jurisdiction incident sharing (flag-gated)
- SLO dashboards and reliability reporting
- Alert correlation and escalation engine
- Staffing and capacity visibility
- Dispatcher wellness monitoring (flag-gated)
- Comprehensive audit trail and access reports
- Stakeholder status pages for major events
- Silent monitor & supervisor assist tools

Enter the Cortex

Rapid Cortex delivers live incident intelligence, supervisor visibility, and operational control into one secure command environment. Use a supported desktop or laptop browser for the full experience.

CAD Integration — On Your Terms

Start with zero integration. Progress at your pace. Primary dispatch always stays in your CAD system.

Security, Compliance & Architecture

Designed from the ground up for public safety compliance — not retrofitted from generic enterprise software.

CJ

CJIS-Aware Design

- CJIS Security Policy alignment controls
- Personnel background investigation processes
- Information Exchange & ISA agreements
- Auditing & accountability logging
- Custom CJIS compliance review packages

TC

Technical Controls

- Multi-Factor Authentication (MFA) enforcement
- End-to-end encryption in transit and at rest
- Role-Based Access Control (10 role types)
- Deception Shield honeypot detection tooling
- Session management & credential rotation

FR

Framework Alignment

- NIST Cybersecurity Framework design basis
- ISO/IEC 27001/27002 aligned controls
- SOC 2 alignment roadmap in progress
- Data retention configuration controls
- Incident response & disaster recovery plans

A Multi-Vertical Intelligence Platform

One platform architecture. Four distinct market verticals. Shared intelligence infrastructure.

Core (911 / PSAP)

The flagship product for 911 dispatch centers, emergency communications centers, law enforcement, fire rescue, EMS, and emergency management. Full dispatcher, supervisor, and command capabilities. 87 features across 12 domains.

Campus

Campus safety and security intelligence for universities, hospitals, and large institutional campuses. Dedicated Cognito role extensions for campus-specific operations, venue management, and occupant safety coordination.

Venue

Live event intelligence for stadiums and arenas. Real-time capacity management, guest incident reporting, ops dashboards, section monitoring, camera integration, and staff coordination during large-scale events.

RC Lite

Programmatic API access for CAD vendors, technology partners, and developers. Integrate AI transcription, real-time translation, and analysis capabilities into existing systems and mobile data terminals.

Competitive Position

More capable than point solutions. More affordable than enterprise incumbents.

Why Rapid Cortex?

Three core differentiators that define how Rapid Cortex competes in the public safety AI market

INDEPENDENCE

Works With What You Have

vs. Axon ecosystem bundling

- CAD-agnostic by design
- No hardware requirement
- Browser + desktop access
- Open API for partners

DEPTH

Every Operational Layer

vs. single-feature point tools

- Dispatcher + Supervisor + Command
- QA, coaching & compliance built-in
- Major incident + war room tools
- Analytics, PIR, and reporting

MISSION ALIGNMENT

Built for 911, Not Adapted

vs. NICE, CentralSquare

- CJIS-aware architecture
- Dispatcher-first UX
- Public safety workflow patterns
- Active 911 operator advisory board

Let's Build the Future of Public Safety Together
