

Rapid Cortex Security, CJIS & SOC 2 Alignment Statement

Agency-facing security posture summary for pilot review.

Positioning Statement

Rapid Cortex is a decision-support platform for emergency communications. It is not a replacement for CAD, telephony, medical direction, law enforcement databases, or dispatcher judgment.

Core Security Controls

Control Area	Pilot Requirement	Production Requirement
Identity and Access	Cognito-backed login, MFA for privileged roles, least privilege RBAC	SSO/SAML option, password rotation, break-glass accounts, quarterly access reviews
Tenant Isolation	Every route and query must enforce agencyId scoping	Automated tenant isolation test suite in CI/CD
Encryption	TLS in transit; encrypted S3/DynamoDB/KVS storage	Customer-managed KMS option for enterprise agencies
Audit Logging	Log user, agency, incident, action, timestamp, source IP	Tamper-resistant audit store and exportable audit reports
Media Security	Expiring links, no public buckets, optional recording disabled by default	Configurable retention, legal hold, and evidence export workflow
Monitoring	CloudWatch alarms, WAF logging, error tracking	SIEM integration and 24/7 incident response procedure
Vendor Risk	Document AWS, SMS, transcription, translation, and email providers	Annual vendor review and security addendum

CJIS Alignment Notes

- Treat CJIS as an alignment target unless and until the agency formally validates the environment.
- Do not claim CJIS certification unless a qualified authority confirms it.
- Document encryption, access control, audit logging, personnel security, incident response, and vendor management.
- Keep NCIC and CJIS-protected data out of early pilots unless separately approved.

SOC 2 Readiness Notes

- Maintain written policies for access control, change management, incident response, vendor risk, disaster recovery, and data retention.
- Collect evidence continuously: deployment logs, access reviews, screenshots, alarm configurations, backup tests, and security scans.
- Do not market as SOC 2 certified until a CPA audit is complete.
