

NEXCORT iQ · INTERNAL PRODUCT REQUIREMENTS

Agency Pilot Scope Agreement — Draft

Editable business and operational terms for a controlled agency pilot. Not a substitute for legal review.

Legal entity: Apps on Demand LLC (Wyoming) · Product: NexCort iQ · Marketing: [www.nexcortiq.us](#) · Ops: [app.rapidcortex.us](#) · (404) 520-1747 · jeff@nexcortiq.us

Pilot purpose

The pilot evaluates NexCort iQ as an emergency communications (and/or named vertical) decision-support platform. It validates workflow fit, operational usefulness, security posture, user experience, and integration readiness. It does not replace the agency CAD, telephony, or dispatcher of record.

Included capabilities (default 90-day pilot)

- Dispatcher and supervisor access for named users (or named vertical roles if this is not a PSAP pilot).
- Live transcription, assistive SOP/AI coaching, and NC Translate as licensed in the SOW.
- Caller text/photo/video intake via expiring links; Video Assist if listed in the SOW.
- Agency-scoped audit logs and pilot usage reporting.
- CAD read-only adapter or mock data — no CAD writes.
- Admin onboarding, MFA, and role management within the agency tenant.

Excluded capabilities unless a written addendum says otherwise

- CAD write-back, CAD-to-CAD mesh, or any automated posting into the system of record.
- NCIC or other criminal justice database access.
- Automated emergency dispatch decisions or medical/legal command replacement.
- External evidence export or Agency Share without dual-admin approval.
- NexIQ Vision / citizen camera share unless named in the SOW.
- List-price sharing by sales contractors; all commercial figures require NexCort Sales Director approval.

Responsibilities

Party	Responsibilities
NexCort iQ / Apps on Demand LLC	Hosted pilot environment, onboarding, security documentation packet, issue tracking, training materials, weekly pilot summary.
Agency	Name pilot users and an admin/IT contact; provide workflow feedback; approve integrations; define retention expectations; keep CAD vendor informed if a read feed is in scope.

Success criteria

- Named users complete the core workflow with the onboarding guide plus one live walkthrough.
- No cross-agency data exposure in tests or production-like data.
- Audit logs show user actions for create/update/media/CAD-read events.
- Media links expire as configured.
- Stakeholders decide: paid deployment, expanded pilot, or orderly wind-down.

CAD write-back (optional, separate)

Not included in the base pilot. Requires a CAD Discovery Workshop, signed write-back addendum, dispatcher-review UX, and an explicit environment flag. Until then the path remains fail-closed.
