

NEXCORT iQ · INTERNAL RBAC

Role Access Matrix v3.0

Replaces v2.0 (nine PSAP/RC roles). Adds **salescontractor**, current CAD fail-closed rules, and product-vertical isolation. JWT custom:role is a single canonical value. o = immutable rcsuperadmin-only; Y = granted; R = read-only / curated; - = not granted; * = may be cross-tenant for RC IT support.

Legend (column abbreviations)

rca=radmin (Platform Owner) · rca=radmin (NexCort Operations) · rcit=rcitadmin · sales=salescontractor · aadm=agencyadmin · ait=agencyit · sup=supervisor · disp=dispatcher · anl=analyst · aud=auditor. Agency columns are always agency-scoped.

Product verticals (not extra matrix columns)

Campus, venue, transit, hospital, and Call Assist use their own role families and consoles. They never land on /{jurisdiction}/dashboard. Do not collapse VENUE_* / CAMPUS_* / HOSPITAL_* / TRANSIT_* / CALL_ASSIST_* to dispatcher. QR/NFC manage: campus admin/supervisor, venue admin/supervisor/operator, transit admin/supervisor — PSAP roles excluded. VENUE_GUEST_SERVICES is not a 911 dispatch role.

Sales contractor (summary)

Give: Sales Portal, deployments map, leads/signals/PSAP prospects/contacts, NexiQ/intel, campaigns, conferences, Pricing Catalog (features only), Service Catalog (no prices), document library, platform notices, Grant Success Program, onboarding packets, system health (read). **Do not give:** Agencies, Users, Billing, Invoices, Feature Flags, Developer Portal, Hiring ATS, full Audit, CAD/incident ops, live list prices. NexiQ sales intelligence is internal — not an agency SKU.

Changes vs v2.0

Added salescontractor as a first-class JWT role with curated CRM/intel and no-price catalogs. Clarified CAD read vs fail-closed write-back. Documented product-vertical isolation and Call Assist console split. Grant Success Program is not Access Overrides (rcsuperadmin Grants remain roadmap / superadmin-only). Never use commsupervisor — canonical name is supervisor. agencyadmin must not land on the live dispatcher workspace.
